

# Smart Water 4 Europe:

Creating the business case for smart water networks

# Thames Water

## Key Facts

UK's largest water and wastewater services provider with 15 million customers and 4,700 employees

### Water services

9 million clean water customers in London and the Thames Valley

An average of 2,600m litres of drinking water supplied per day

Operation and maintenance of 102 water treatment works, 30 raw water reservoirs, 288 pumping stations, 235 clean water service reservoirs and 32,000km of water mains

Our tap water costs less than a tenth of a penny per litre

Drinking water quality is meeting 99.99 per cent of stringent tests (500,000 tests/year)

### Sewerage services

15 million wastewater customers

350 sewage works treating an average of more than 4.4bn litres per day of wastewater

110,000km of sewer, 2,530 pumping stations and 1.2 million manholes

Two sludge-powered generators and 19 combined heat and power plants generating 153 GWh of renewable electricity

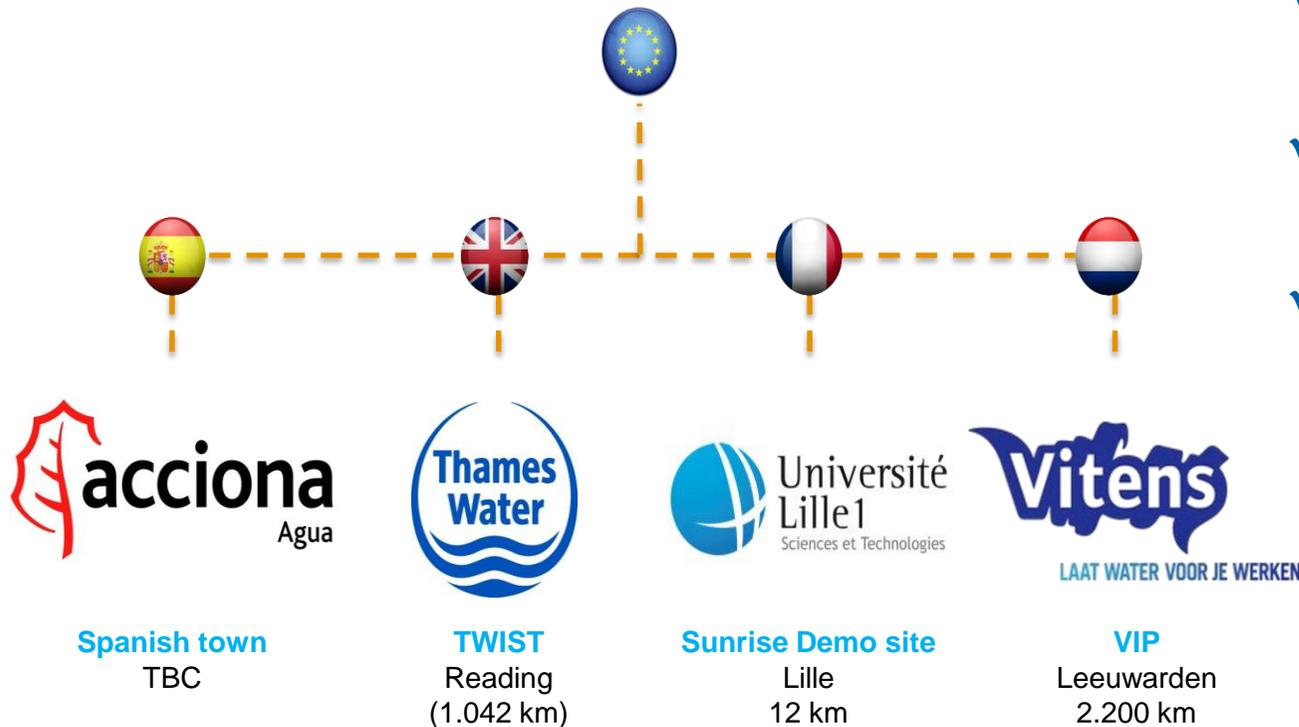

# What is SW4EU ?

- ✓ Smart Water Networks demonstration project
- ✓ 21 Organisations
- ✓ 4 years
- ✓ 4 demonstration sites
- ✓ Started Jan 2014

# Why are we working with overseas partners?

- ✓ Not all solutions are in the Thames Valley
- ✓ Benchmarking opportunity
- ✓ Working together with some of the best in the sector

# What are we going to do?

Energy Optimisation

Leakage management

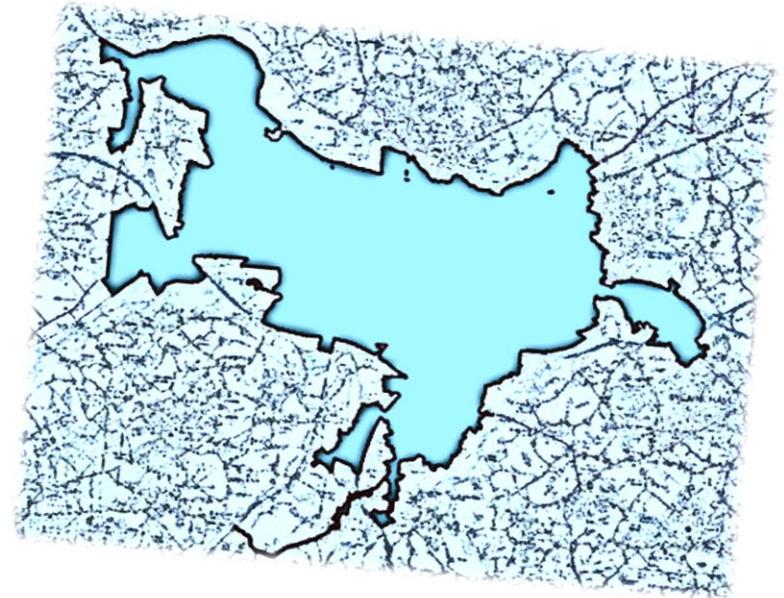

Customer interaction

We are building a demonstration site in Reading, where SW4E will focus on delivering three key benefits

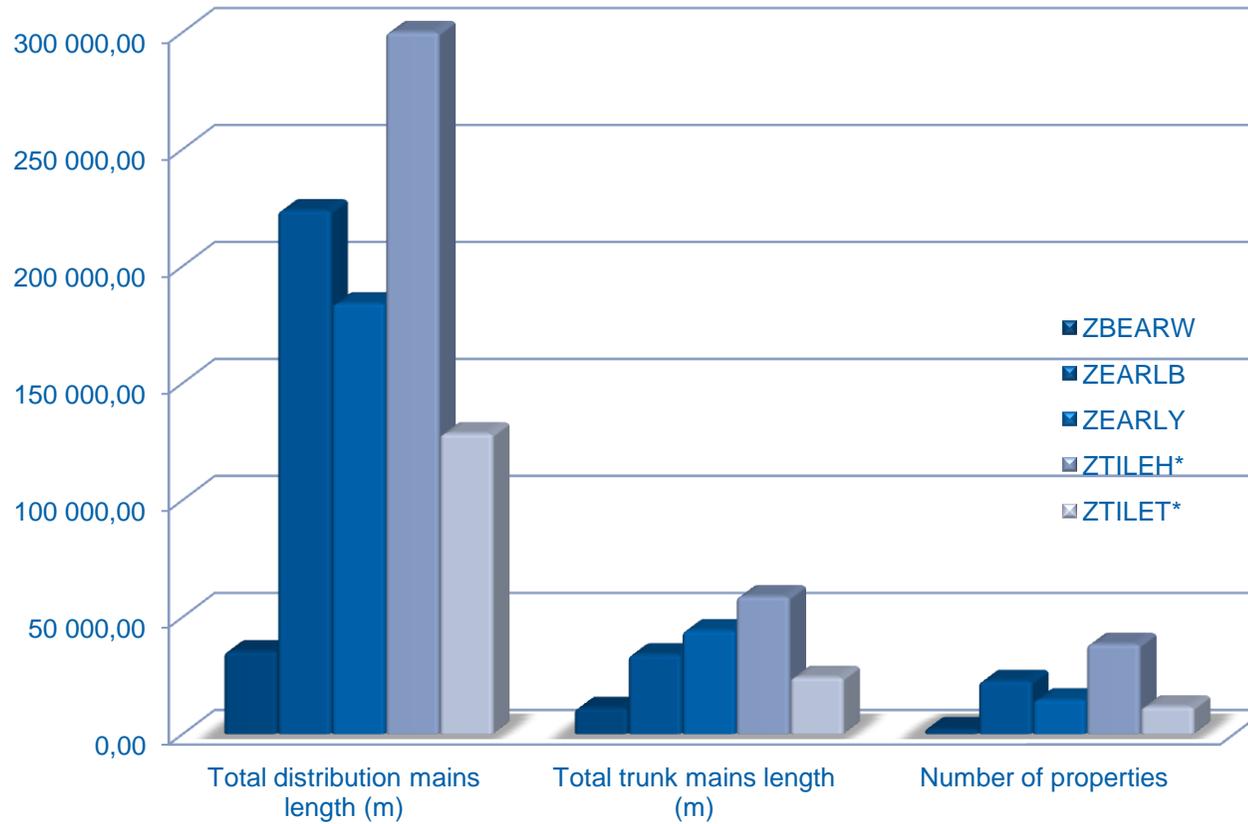

# What is the UK demonstration site?

- ✓ Area fed by Fobney WTW
- ✓ 870 km of distribution mains
- ✓ 172 km of trunk mains
- ✓ 45 MI/d of chlorinated potable water
- ✓ Ø from 4" (100 mm) up to 32" (800 mm)
- ✓ Many pipes over 60 years old
- ✓ 89.000 customers

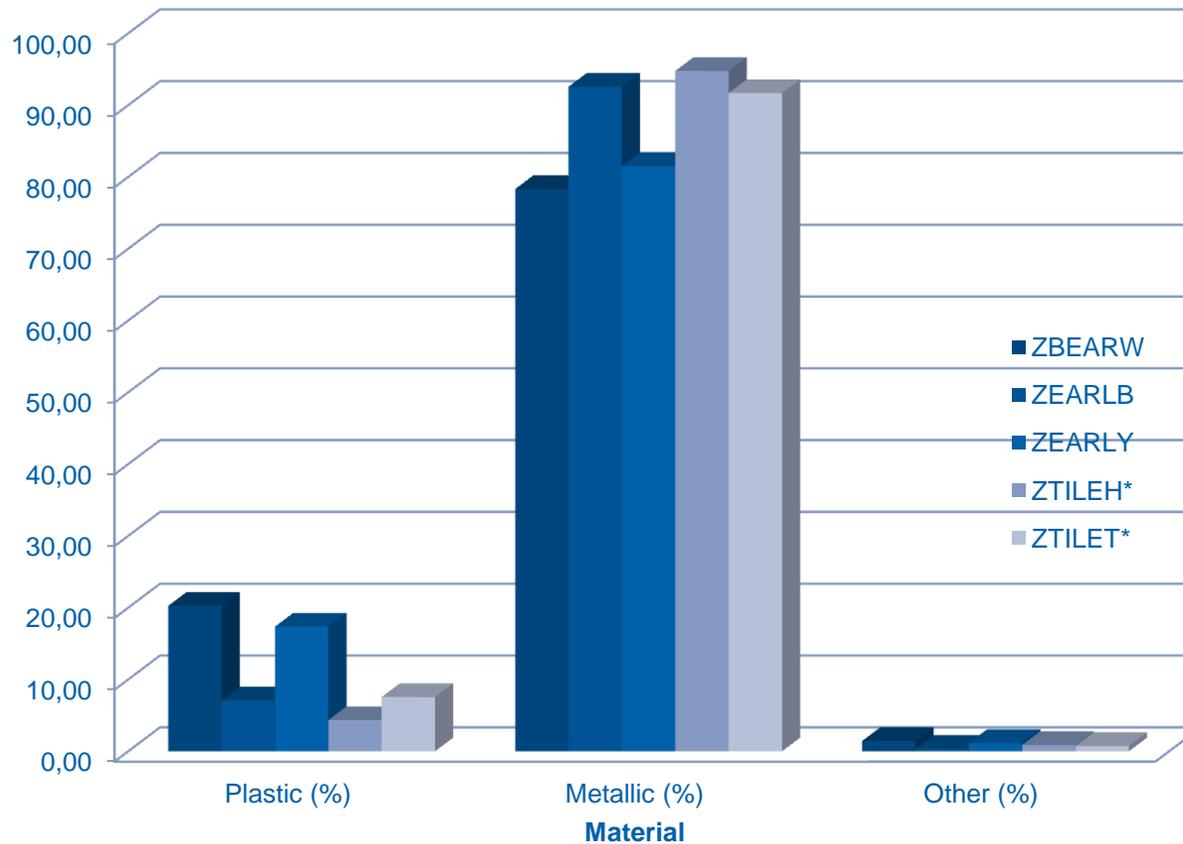

# TWIST

## Mains attributes

# TWIST

## Materials type distribution

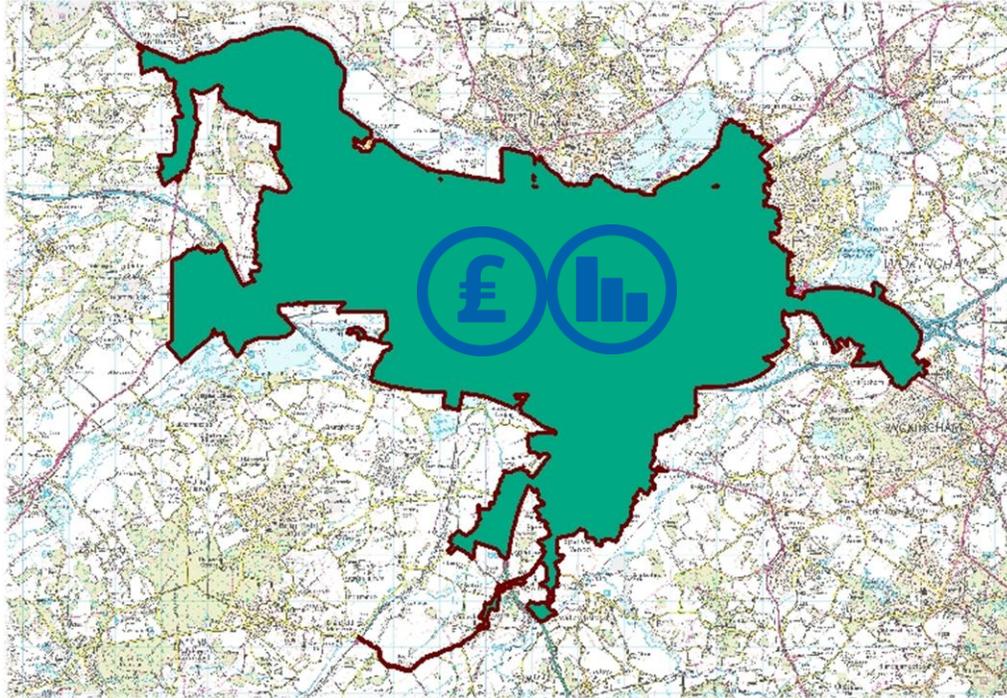

# What does SW4EU mean for our customers?

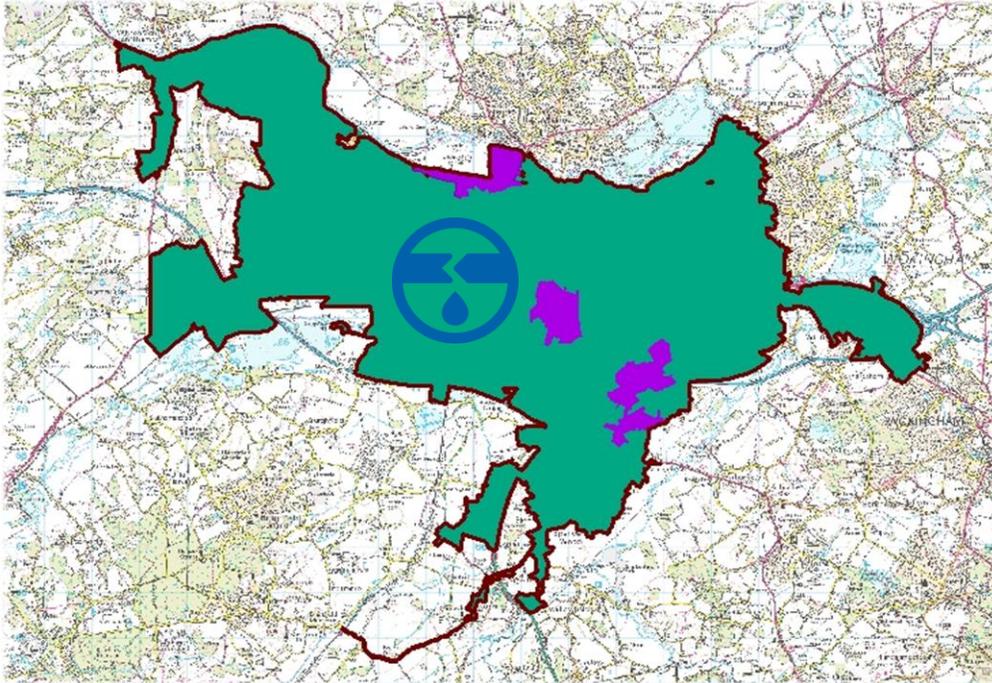

- ✓ Industry-leading leak monitoring equipment
- ✓ No bill impact
- ✓ Better managed operational events
- ✓ Less disruption
- ✓ Real time information about their consumption

# Energy Optimisation

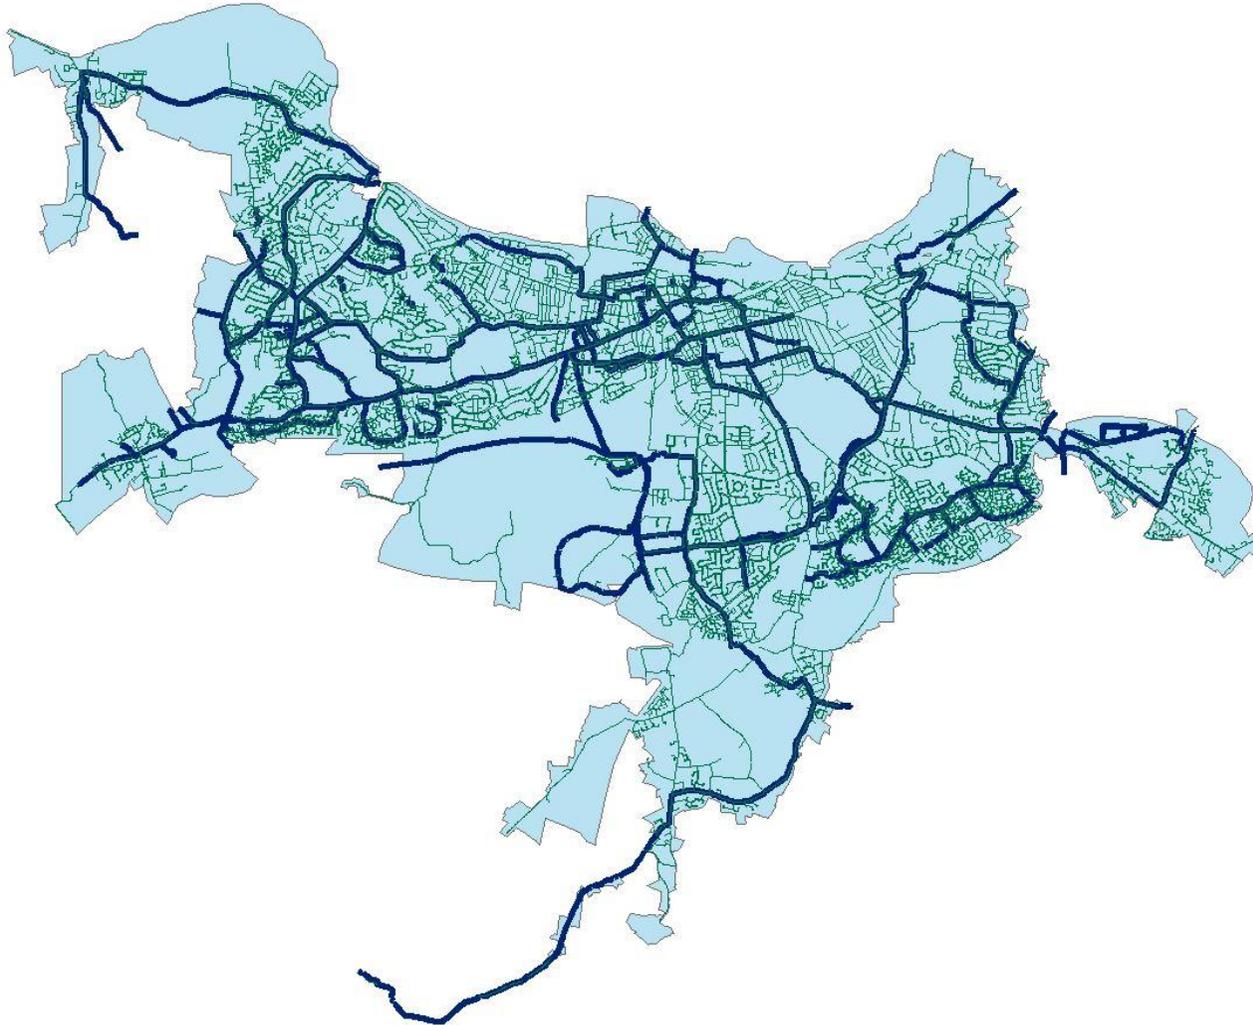

- ✓ Energy optimisation in the network
- ✓ Holistic approach with leakage
- ✓ Whole of Fobney WTW fed area

# Leakage Management

- ✓ Find leaks soon after they occur / failure mechanisms before they occur.
- ✓ 4 DMAs featuring absolute water balance
- ✓ Installation of a range of technologies

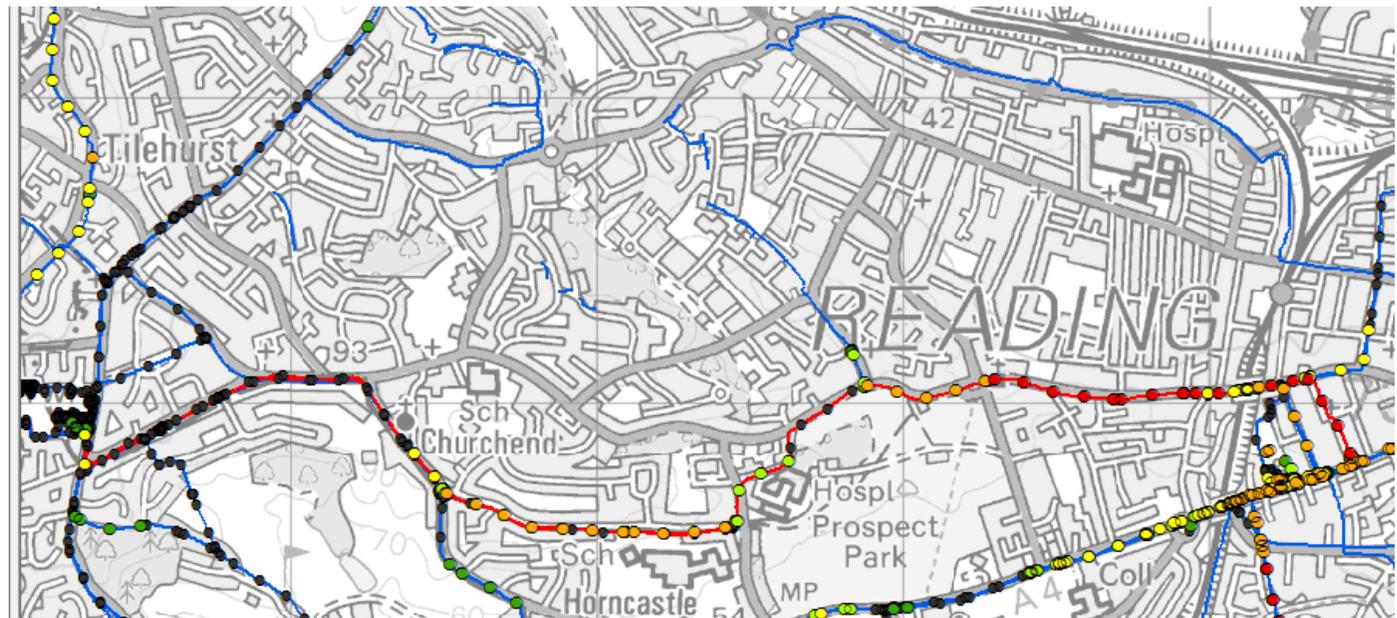

# Demonstration Site – Trunk mains

# Demonstration Site – Trunkmains

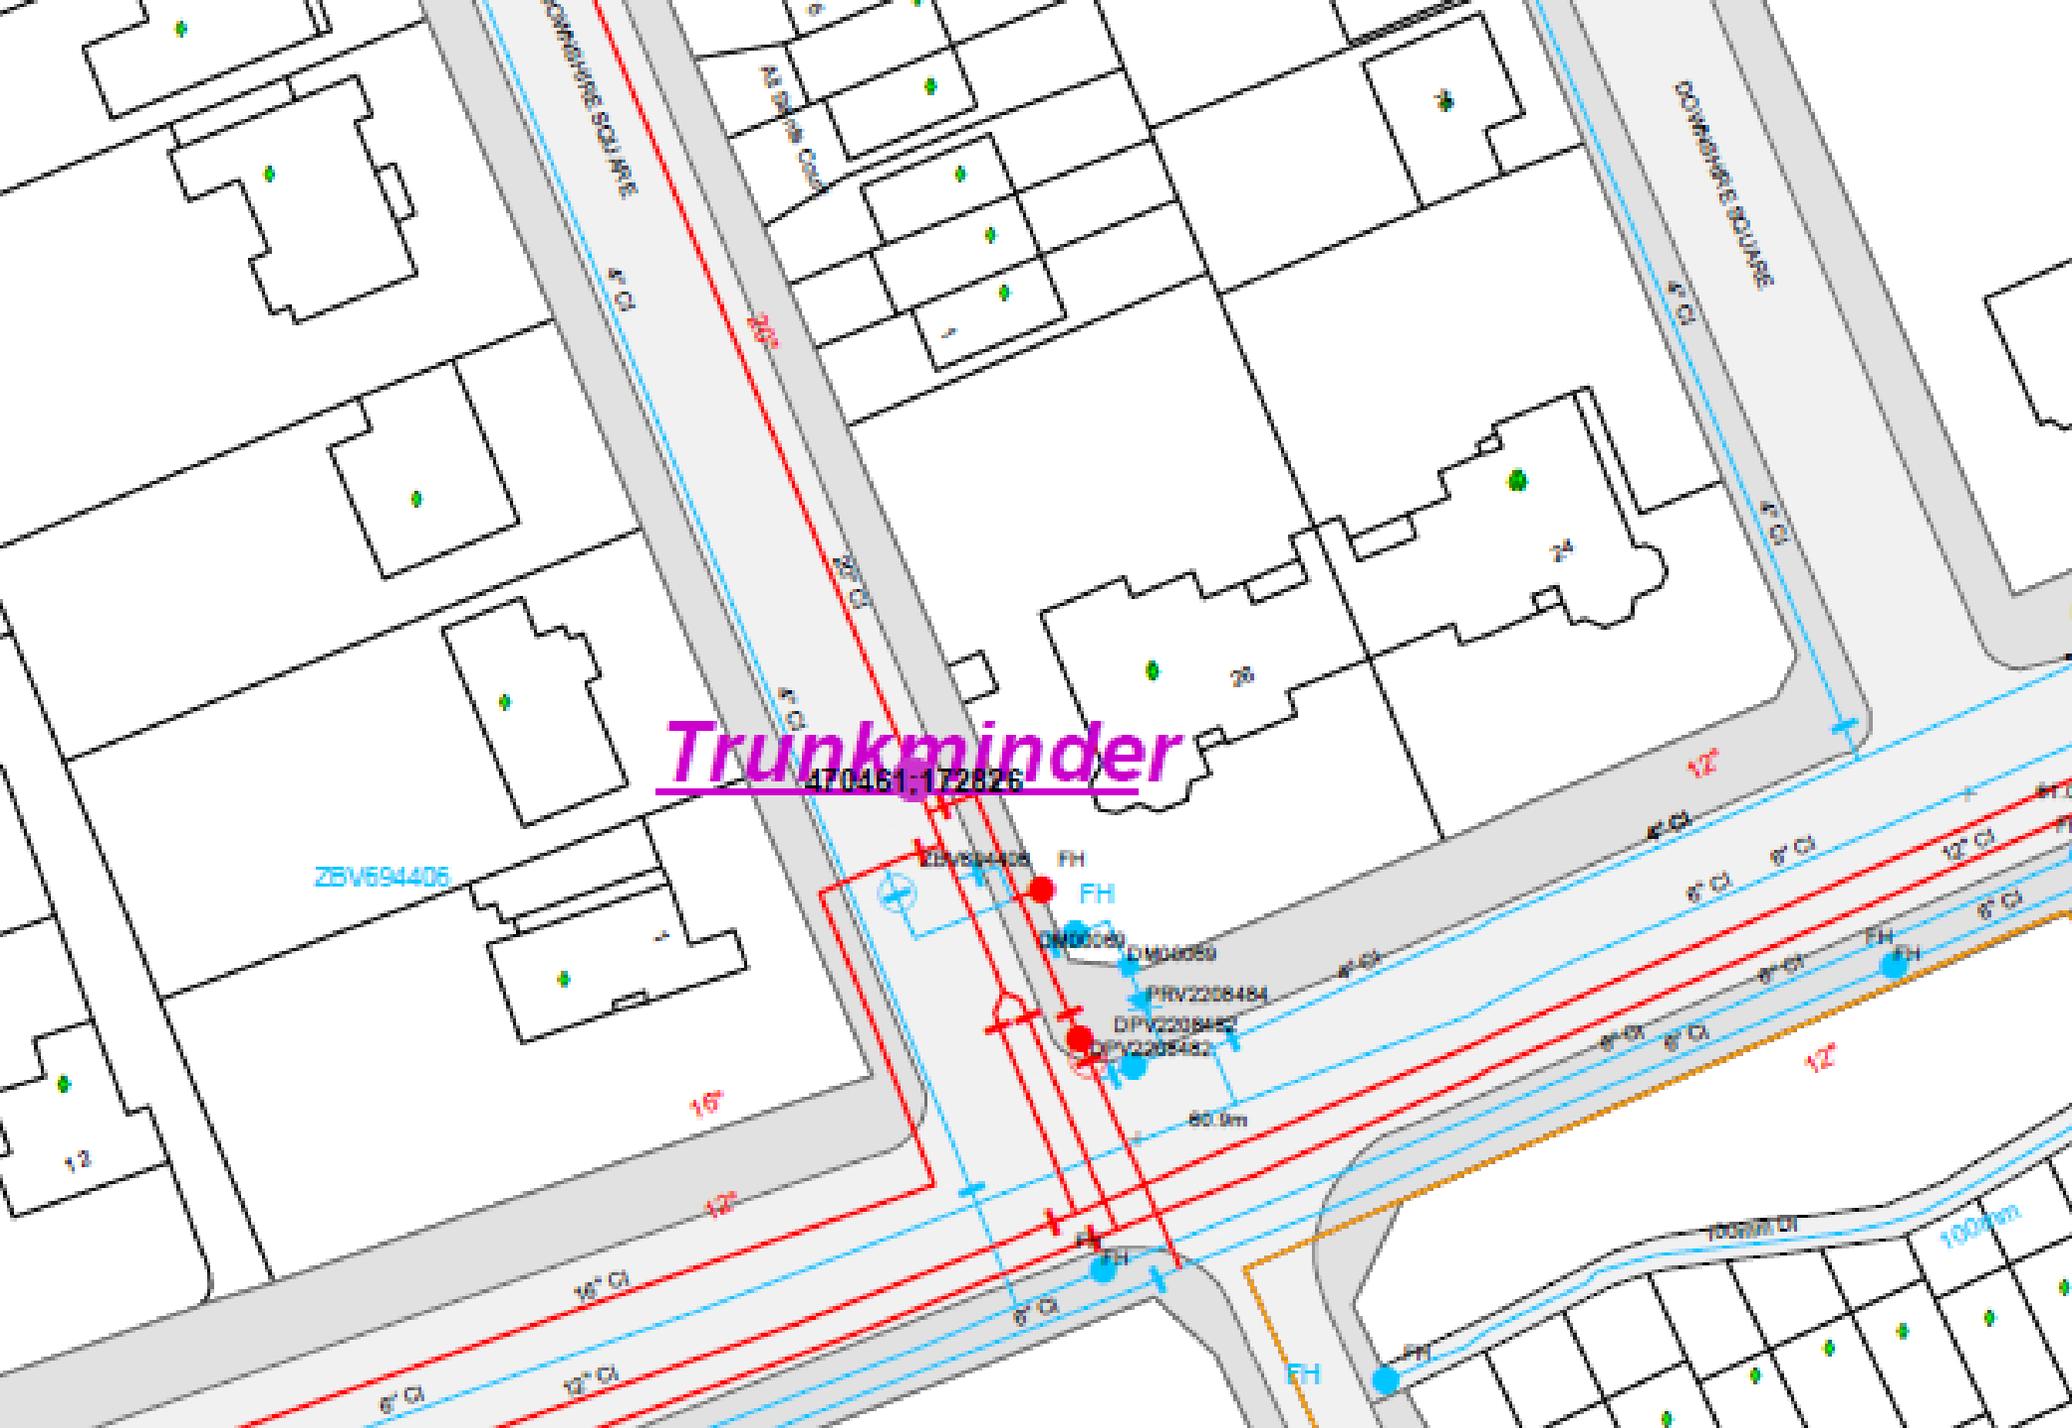

The project will instrument the riskiest 20" trunk main in Reading for a very low capital cost, benefiting customers earlier.

- Risk
  - COFRank
    - 1 - 1,000
    - 1,001 - 5,000
    - 5,001 - 10,000
    - 10,001 - 20,000
    - 20,001 - 50,000
    - 50,001 - 157,507
- Option AB+ Solution
- SimulatedBurstPoint
- CW\_FloodExtent
- ZTILEH\_PM\_G\_20in
- TMD
- DG3 Valves (Valve Criticality)
- River\_Thames
- Clean Water Mains
  - Connection Main
  - Distribution Main
  - On Site Process Main
  - Trunk Main

# Work we've done

- ✓ Defined the solution
- ✓ Established requirements
- ✓ Construction
- ✓ Documentation

# What is next?

- ✓ Integrate the sensors
- ✓ Hydro Analytics
- ✓ Cost – benefit analysis
- ✓ Prove the value!
- ✓ Dissemination
